**Subject:** Thank you for Big Rock Quarry!

Dear Mayor Smith,

Let me express my appreciation for the wonderful corner of nature as Big Rock Quarry, where we were able to observe such a magnificent geological outcrops .

We visited Big Rock Quarry May 7th 2015 during fieldtrip under the guidance of Rick Kear and Doug Hanson (from Kear Geoscience, LLC. And the Arkansas Geologic Survey).

I am working as a geophysicist and geologist in Schlumberger in Moscow, Russia , and visiting the Big Rock Quarry was really useful for my work . Thank you for having kept these monuments of geology in such good condition!

**Best Regards,**

**Elizaveta Khromova**

**Subject:** Fantastic outcrop at Big Rock Quarry

Mr. Mayor,

This is Ching. I come from Beijing, China. My colleagues from Schlumberger and I visited the outcrop at Big Rock Quarry last week and I really enjoyed the fantastic view there. I hope I can visit it next time, maybe with my friends or my family. Thank you so much.

Thanks & Best regards,  
Ching

**Mr. Mayor,**

We took a outcrop field trip on May7,2015, under Doug Hanson (From the Arkansas Geologic Survey) and Rick Kear (from Kear Geoscience, LLC.)'s guidance. The classic outcrop and beautiful view are very impressive.  
Thanks for keeping the site free of development.

Regards,  
Qing Shan Li

Mr. Mayor,

I would like to express my excitement and admiration to the Big Rock Quarry park I visited on May 7<sup>th</sup> this year during Schlumberger geological training courses with my great instructors Doug Hanson (From the Arkansas Geologic Survey) and Rick Kear (from Kear Geoscience, LLC.).

It's a fascinating place with unique geological structure, and I had a very good time visiting it.  
It would be a great shame if such a magnificent place ceased to exist.

Thank you for the opportunity to visit and observe this geological miracle.  
Hope, many future generations of geologists through all over the world will also have such an opportunity.

Best regards,  
*Anna Shcherbakova*

**Subject:** Big Rock Quarry

Mayor Joe Smith,

I want you to realize that North Little Rock controls a world class geological location of deepwater sedimentary deposits at Big Rock Quarry. I along with Doug Hanson of the Arkansas Geological survey recently lead a DeepBlue2 class for Schlumberger's PTS Training group to Big Rock Quarry. That was probably the 50th class or more that I have lead into Big Rock. This last class was pretty representative with geoscience attendees from China, Russia, Indonesia, Equator, India and the US, so you see North Little Rock is receiving visitors from all over the world.

Please do all in your power to preserve the Big Rock Quarry for future geoscience expeditions and classes! Do not allow it to become a commercial development project! I live in Conway Arkansas so am relatively local and would be happy to make similar statements before any committee or council meeting you might ask me to speak to.

God bless you,

Rick Kear

**Subject:** Thank you for protecting Big Rock Quarry!

Mr. Mayor,

I work in Denver as a Geophysicist and I had the pleasure of visiting the exquisite turbidite outcrops at Big Rock Quarry in North Little Rock a few weeks ago. I visited the quarry as part of a training course lead by Doug Hanson from the Arkansas Geologic Survey and Rick Kear. I have to tell you that it was an eye-opening experience to see this type of rare geology in such a clear and accessible way. I wanted to thank you for continuing to protect the park so that many more people will be able to learn from this world-class outcrop. I look forward to visiting again in the future.

Sincerely,

Kelsey Schiltz
